

MODEL BUILDING & ENGRAVING SET

TBES-40/2009UK

QUICK START GUIDE

Easy steps to getting started:

- 1.- Insert one plug of the connection wire in the adaptor's socket and insert the other in the socket of the tool.
- 2.- Choose an accessory and turn the collet chuck grip slightly while holding down the spindle-lock button until the button engages.
- 3.- Put the accessory you have chosen in the collet and tighten as much as possible.
Tighten the collet chuck grip.
- 4.- Set the speed and plug the adaptor into the mains.
- 5.- Switch the power button to position I and adjust the speed.

If in doubt please refer to the user manual for further information.
